## MoCart Specifications

- Cart footprint 20" x 26"
- Cart height 40" or 50"
- Weighs approx. 44 lbs.

Snap-on plunger makes easy adjustment of accessories on-the-fly

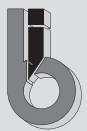

The MoCart (Method of Operation Cart) includes an entire line of patent pending accessories for all areas of the production factory and test labs, and is available in two cart heights 40" or 50".

The key feature of the new MoCart is that all accessories simply snap-on and are easily adjustable on-the-fly. As an additional benefit, the MoCart is easy to handle due to its lightweight and small footprint of only 20" wide.

The complete line of accessories includes storage and staging of PC boards using the PCB Vertical Carrier, All-in-One Kit Cart, SMT reels, stencils, hanging bins, feeder storage, and storage shelves.

For years, customers have told us that we needed to build a less expensive line of smaller carts that are versatile and can meet almost any need at any time. We finally came up with the perfect solution. We clearly have created what everyone has been looking for.
